Acknowledgements

I am indebted to artist Eugene Hoffman -- his creative work provided the spark that started me down the road of paper sculpture.

I wish to thank the National Physical Science Consortium and the National Institute of Standards and Technology for their support through the past years of graduate school -- they have given me the freedom to explore the academic pursuits I found most interesting. Similarly, the Regents' Scholars program at the University of Hawaii at Manoa gave me an invaluable opportunity during my undergraduate years and also provided me with wonderful academic support. The work in this thesis was supported in part by NSF grant IRI-9258684.

The members of my committee -- Andrzej Ehrenfeucht, Steve Guberman, Clayton Lewis, Walter Taylor, and Ben Zorn -- have provided invaluable suggestions, comments, and feedback. I would like to thank them for the time and care they have taken to guide this work.

Jim Spohrer, Jamie Dinkelacker, Kurt Schmucker, and Mike Mills were great sources of encouragement from the earliest stages of this work. Gerhard Fischer, the Center for Lifelong Learning and Design, and the Institute of Cognitive Science have been immensely supportive. I would like to thank Chris DiGiano, Julie DiBiase, Jim Ambach, Andee Rubin, Tom Wrensch, and Glenn Blauvelt for their wonderful friendship, insight, and conversations. I would also like to thank Francesca Iovine for her cheerful support since the first glimmerings of these ideas, and for her help in working logistics magic. JB Nation, Everett Harvey, Ted Hopp, and Cathleen Diaz-Pluguez have been wonderful mentors and role models.

Additional thanks go to Oscar Trono, Sophia Stoller, and New Vista High School for allowing us to teach our experimental courses in their classrooms; to Allison Druin and the CHIKids program; and to Allison Moore, Laura Douglas, and the Collage Children's Museum for all of the years they have encouraged us in our work with children.

My parents and my brother have always supported me in so many ways, and I wish to thank them infinitely, for everything. Amy Hosokawa's humor and friendship has kept me sane over the years. Rhombi Eisenberg has also been central to my sanity and happiness. Finally, words cannot describe the gratitude I feel toward my husband, Mike -- my collaborator and partner.
