Worksheet:: Evaluating User Study Data

Types of methods used? (CW, Think Aloud, WOO) Why method selected?

How did you recruit participants?

of participants:

Demographic data: (ages, gender, experience) If you do not have this (e.g., anonymous survey, describe why you did not collect this data)

What did you do for the study (Describe your protocol – introduction, tasks, discussion)?

What kind of data did you collect (Kinds of quantitative; Kinds of qualitative)?

Themes from your data (data crunching needed for this step)...

Improvements to study:
