

# Medical Informatics Standards

Class 34

# Quiz 8 (Last Quiz)

- Choose 1 of the following quotes from the paper and discuss the implications of the statement from a health informatics perspective:
  - Models that included the geographic distance between the ego and alter corroborated the result shown in Figure 3B: geographic distance did not modify the intensity of the effect of the alter's obesity on the ego.
  - The spread of obesity in social networks appears to be a factor in the obesity epidemic. Yet the relevance of social influence also suggests that it may be possible to harness this same force to slow the spread of obesity.
- Argue in favor or against this statement, "One of its axioms is that the computerization of any system that depends upon human behavior for its success is automatically a wicked (very difficult) problem."
