Yahoo Pipes

ez mashups
About Pipes

Pipes is a powerful composition tool to aggregate, manipulate, and mashup content from around the web.
Why do you need it?

- Mash-up requiring multiple APIs/RSS feeds
- Usual process - for each request:
  - Fetch all the feeds
  - Process them
  - Consume
- Pipes approach:
  - Create a pipe - once
  - Fetch from this pipe for each request
Advantages

- Create your customized feed with all the info you need
  - Once............graphically
- Use as many times as you like
- Shifts load from your servers to Yahoos'
- Sharing:
  - Use public pipes created by others
  - Share your pipes with others
